

The award winning **Diamon-Fusion**<sup>®</sup> low-maintenance protective coating and **Glass Rescue**<sup>™</sup> were applied to the glass surfaces of **PT. Albasia Bhumiphala Persada**, a leader in the global timber industry in Indonesia, to restore their 25 year old glass surfaces and protect them from future damage.

**Glass Rescue**<sup>™</sup> effortlessly restored the glass that was damaged from lime scale, calcium deposits, soap scum, hydrocarbon pollution and other containments. **Diamon-Fusion**<sup>®</sup> low-maintenance coating was then applied and will protect the glass for years to come revitalizing its brilliance and creating a more hygienic surface eliminating the need for harsh and harmful chemical cleaners.

*“Thanks to DFI, our 25 year old glass has been restored to look like new. Because of DFI’s products, we **did not have to incur the cost of replacing the glass** and brilliance of the surface has been fully restored. The glass surfaces now experience a **cost-effective monthly maintenance plan** and will **decrease the need to clean our glass surfaces by 90%**, while promoting our mission to create a greener environment without the need to harsh chemicals.”*
