PULLMAN JAKARTA INDONESIA
THAMRIN CBD HOTEL

DFI TESTIMONIALS

STORM CHASERS: "We had all the windows in the car treated with Diamon-Fusion® ULTRA™. Many other storm chasers reported broken windows after we had these monsters coming down on us. Mainly hen egg hail with a few tennis balls mixed in. We received heavy body damage but no broken windows! Thank you Diamon-Fusion International!" Storm Chaser - Kevin Saunders, Texas (USA)

PRO RACING an Argentinean high-speed racing team: "With respect to the utilization of the Diamon-Fusion® protective coating, we apply it every time we replace the windshields wipers. During rain, Diamon-Fusion® notably improves the visibility because the water droplets run rapidly over the windshield and in some cases, it eliminates the need for the electrical windshield wipers. It also improves the efficiency of the windshield wipers in the case of removing oil or mud. **It has truly been a great safety feature for our team as Diamon-Fusion has not only demonstrated great impact resistance but improved race track visibility during rainy conditions, a very significant asset for our drivers.**" - Rafael Croceri, Race track & Logistics Engineer, Team CHEVROLET YPF Super TC2000

KELOWNA MOTORS—MAZDA DEALERSHIP: "DFI truly sets the standard when it comes to windshield protective coatings, nothing else comes close."

- Brian August, 2nd Generation Dealer Principal, Kelowna Mazda
Past Director, BC Auto Dealers Association, Kelowna Motors, Kelowna,
British Columbia (Canada)
