

# SUPERIOR GLASS PROTECTION

Keep glass surfaces clean and resistant to harmful contaminants with Diamon-Fusion®

Transparent and ultra-thin, Diamon-Fusion is a permanent protective coating that fills in the microscopic peaks and valleys of glass and glass-like surfaces by chemically bonding to the glass. As a result, surfaces treated with Diamon-Fusion are much easier to clean than non-treated surfaces. From hard water stains to environmental pollutants, fewer contaminants can stick to the glass reducing cleanup and addressing mold and bacterial growth.

- Addresses water buildup for less mold/bacterial growth
- Creates a more hygienic environment
- Upgrades unprotected glass surfaces
- Saves cleaning time and effort
- Keeps glass clean and clear

## Effective for multiple purposes:

- ✓ Retail glass barrier
- ✓ Hospital glass
- ✓ Interior glass
- ✓ Granite countertops
- ✓ Bathroom tile
- ✓ Glass handrails and railings
